Strong 2-yr.
plants, 60c ea.

GRAPES 60c each; 10 for \$5.50

Concord. Over a hundred years old and still the one indispensable Grape. Blue-black in color, large, high quality. Produces huge crops on practically any type of soil and is resistant to insects and disease. Makes excellent juice, jam and jelly. Every vineyard needs plenty of Concord.

Carmen. Bears large, very compact clusters of dark red Grapes. Skin is thin but tough; the interior is meaty, firm but tender and of splendid quality. One of the most prolific and popular varieties for the South. Good for eating, for preserves or jellies. Ripens in July.

Niagara. The standard white table Grape. A favorite with home and commercial growers as well. Bunch and berries are large, greenish white at first, becoming pale yellow when entirely ripe. Skin is thin but tough. Makes a fine market appearance because it does not crack easily.

PECAN. When one of our customers told us that he got 150 pounds of Pecans per tree, with 16 trees to the acre, we realized this meant a cash income of \$720, assuming the price of nuts to be 30c per pound. Of course, this is good production, but with proper management it is within the reach of any grower. And don't forget this—assuming the trees are planted 60 feet apart (16 per acre), the grower can also utilize this land for cash crops during the first few years while the trees are young. We have delivered these money-making Pecan trees throughout the South during the past quarter century. Our production has been increased to meet growing demands. Note new low prices!

NUT BEARING TREES

PAPER SHELL PECANS

STUART, SUCCESS, BURKETT AND MOORE

2 to 3 ft., \$2.25 each; 3 or more, \$2.00 each.

3 to 4 ft., \$2.95 each; 3 or more, \$2.75 each.

TREES FOR SHADE AND BEAUTY

POPLAR—LOMBARDY. A tall, slender tree of rapid growth, reaching great height. Specimens often reach 50 feet, with a spread of less than 10 feet, and for this reason when trees are needed for narrow places, between buildings, congested lawns, narrow avenues, Lombardy Poplar may be used to advantage. Because of its great height and quick growth it is recommended for backgrounds of buildings, to add character to plantings or to offset straight or bare lines; and for quick effects we recommend it. Price each, 4 feet, 39c.

MIMOSA (Silk Tree). Wide spreading; feathery foliage. Pink flowers at branch tips in late spring. Fast growing. Very graceful as specimens and much in demand. Price each, 4 feet, 98c.

LOMBARDY POPLAR,
DOGWOOD (White),
CHINESE ELM,
MIMOSA

CHINESE ELM. A beautiful shade tree for lawn plantings. Very much in demand because of its quick growth and it makes a good shade much faster than any other plant. Bright, fresh looking foliage and compact shape. Stands drought and cold remarkably well and retains its foliage until late autumn. Price each, 5 feet, 98c.

DOGWOOD—CORNUS FLORIDA (Native White). Beautiful four petal white flowers of 3 to 3½ inches in diameter literally cover the plant in the spring before the leaves appear. Dark green, luxuriant foliage makes this a beautiful plant all summer and into the fall when the leaves turn a lovely crimson. Price each, 3 feet, 98c.
